Run level pair buffering for fast variable length decoder circuit
T Ozcelik, SC Gadre, M Bubil, S Dutta, S ... - US Patent 5,903,311, 1999 - Google Patents
... The MPEG2 standard relies upon three types of coded pictures. I ("intra") pictures are **fields** or
frames coded as a go stand-alone still image. Such I pictures allow random access points within
a video **stream**. As such, I pictures should occur about two times per second. ...

Pipeline processing machine with interactive stages operable in response to ...
AP Wise, MW Sotheran, WP Robbins - US Patent 6,263,422, 2001 - freepatentsonline.com
... A priority selection circuit, responsive to the codewords CW and T, **parses** the codewords CW
into ... data from which a receiver can determine re-entry points into the data **stream** on the ... 5,168,375
discloses a method for processing a **field** of image data samples to provide for one ...
Cited by 1 - Related articles

Pipeline processing machine having a plurality of reconfigurable processing ...
AP Wise - 2000 - freepatentsonline.com
... A priority selection circuit, responsive to the codewords CW and T, **parses** the codewords CW
into ... data from which a receiver can determine re-entry points into the data **stream** on the ... 5,168,375
discloses a method for processing a **field** of image data samples to provide for one ...
